

# Steal Our CEO's AI Stack

A simple field guide for local businesses that want faster content, cleaner follow-up, better lead capture, and fewer missed opportunities.

| Job       | Tool Type                 | How We Use It                                                                           |
|-----------|---------------------------|-----------------------------------------------------------------------------------------|
| Ideas     | AI assistant              | Turn messy notes, customer questions, offers, and sales calls into campaign angles.     |
| Content   | AI writing + design       | Create first drafts for posts, ads, emails, scripts, and landing page sections.         |
| Video     | Editing + captions        | Cut raw footage into short-form clips, add hooks, captions, and calls to action.        |
| Capture   | Landing page + forms      | Send ad traffic to one focused page with name, email, phone, source, and offer tracked. |
| Follow-up | CRM + automations         | Text, email, assign, tag, and notify the team within seconds of a new lead.             |
| Reporting | Pixel + UTMs + dashboards | Separate attention metrics from actual leads, appointments, and sales conversations.    |

## The 5-Part Follow-Up Stack

- 1. One clear offer.** Give the ad one job: AI Stack download, funnel audit, quote request, or booked call. Do not ask cold traffic to choose from six options.
- 2. One conversion page.** Use a short page with the promise, proof, and a form above the fold. Ask for name, email, phone, and one qualifier.
- 3. Instant routing.** Send the lead to your CRM with source, campaign, ad, landing page, and offer attached.
- 4. Speed-to-lead automation.** Trigger a text, email, and internal notification immediately. The first five minutes matter.
- 5. Human follow-up.** Use AI to prepare the context, but have a real person call high-intent leads while the ad is still fresh in their head.

## Copy/Paste Prompt: Turn Views Into Leads

I have an ad getting attention but not enough leads. Build me a conversion path with: one lead magnet offer, one landing page headline, three bullets, a form with name/email/phone, a thank-you page CTA, a 5-message follow-up sequence, and the UTM fields I should track.

## What To Track In Meta

**Campaign objective:** Leads or Sales, optimized for the Lead event.

**Do not optimize for:** Landing Page Views once you are ready to collect contacts.

**Required fields:** first name, email, phone. Add one qualifier only if sales quality is weak.

**UTM example:** utm\_source=meta, utm\_medium=paid\_social, utm\_campaign=ceo\_ai\_stack, utm\_content={{ad.name}}.

## Launch Checklist

| Step                           | Done When                                                                                |
|--------------------------------|------------------------------------------------------------------------------------------|
| Duplicate the winning creative | The original view campaign stays untouched and the new campaign optimizes for Lead.      |
| Use one clean URL              | CEO Stack traffic goes to /ai-stack. Funny follow-up traffic goes to /funnel-leak-audit. |
| Require the right fields       | Name, email, and phone are required. Lead volume is optional for qualification.          |
| Confirm the CRM record         | The contact arrives with offer, ad hook, source, campaign, content, term, and page.      |
| Call fast                      | A person follows up while the ad and offer are still fresh in the lead's head.           |

**Want this built for you?** Sales Funnel Marketing can connect the ads, landing page, CRM, automations, and reporting. Call/text 419-308-4576 or visit [salesfunnelmarketing.us/ai-stack](https://salesfunnelmarketing.us/ai-stack).
